

## SAFETY FIRST:

If you are collecting the equipment for someone else please make sure this sheet is given to the equipment user to read. In accordance with Health and Safety in Employment Act requirements, this sheet should be given to the site supervisor if the equipment is being hired for use at a commercial worksite so that the information is available to all users.

## Required Safety Equipment

Ear Muffs

Gloves

Boots

Protective Clothing

Face Shield

Visual Inspection

## Pre Start Checks and Safety

- ! Fuel tank is full (straight petrol)
- ! Engine oil is at correct level
- ! Check oil level in compressor unit
- ! Position on a level surface
- ! Ensure the air tank is empty of air
- ! Employ safe working practices
- ! Use the correct size hosing to suit the job
- ! Never use frayed, damaged or deteriorated hose
- ! Never use compressed air for breathing unless used through a filtration unit
- ! Compressed air is dangerous, treat with extreme care

## Pre Start Checks and Safety Con't

- ! Never blow compressed air onto or at body areas
- ! Never allow air to blow through a loose ended hose
- ! Ensure hose end is secured
- ! Never refuel engine while it is running

## When Operating

Connect air supply lines to the outlet tap and to the appliance/tool being used  
Open air outlet tap

## Starting procedure

Turn on fuel supply  
Turn on engine switch  
Choke engine (cold start)  
Pull start cord until a slight resistance is felt  
Let cord recoil and give sharp pulls to start engine  
Release choke when engine starts or fires

## Stopping and After Use

Close air outlet tap  
Turn off engine  
Close fuel supply  
Discharge air from hose and appliance/tool  
Disconnect hoses and roll up
